SBA
U.S. Small Business Administration

Premiers Secours (PS) is a prime contractor and supplier to medical, surgical, and kindred healthcare operations. PS is a manufacturer representative for **Sterling Medical** (FDA # 1422598) a U.S.A.-based manufacturer of sterile, single-use medical instruments and products. **Gordon Healthcare Technologies** is a *Strategic Partner* with Premiers Secours, and through this relationship, we design and build modular surgical centers. PS is based in Summerlin Nevada, and has sales & distribution facilities in Atlanta, GA., Chicago, IL., San Diego, CA., and Lagos, Nigeria.

During the peak of the pandemic, Premiers Secours was successful in creating a reliable, supply chain network that provided critical personal protection equipment, surgical instruments, and medical/surgical products and supplies to myriad end users both in the USA and internationally.

We design, build, and manage modular, hyperbaric, burn, and wound care Surgery Centers and Sustainability Systems.

Gordon Healthcare Technologies (GHT), under the direction of Dr. Stephen Gordon, GHT designed, built, owned, and operated an Accredited Class 3 (general anesthesia) Cosmetic Surgery Center and Medical Spa for over 20 years. Dr. Gordon has inspected and certified surgery centers for governments and NGOs and he is the founder and Medical director of GHT. Dr. Gordon is a cosmetic, plastic & reconstructive surgery specialist. He has over 47 years of experience in the medical field. He graduated from Howard University College of Medicine in 1975

An estimated thirty million Americans many in rural regions of the country, live at least a sixty-minute drive from a hospital or Quick Care with trauma or wound care capability. Sadly, this is a reality throughout the world, but drastically worse in low- and middle-income countries. Our modular surgical center addresses this problem.

Modular, Surgery Centers

Not only in America but worldwide, some regions are described as medical deserts. Offsite construction, testing, and certification with shipping of medical facilities to final destinations are rapidly becoming the new standard for seamless, high-quality, cost-effective construction of highly specialized surgery facilities.

Designed and built in the U.S.A., our surgery centers can be deployed to locations of need anywhere in the world.

Entry-level example of a basic one-story facility. Fully equipped with durable medical devices, surgical instruments, and sterile products and supplies. We train staff and oversee operations to ensure sustainability.

Detailed plans include site prep and transport from the U.S. to the final location.

Buildings are permanent and can be easily disassembled and moved to new locations.

Everything is assembled, tested, and certified in America prior to being disassembled and shipped.

Modular units include a patient administration station, examination rooms, labs, doctor/nurse offices, an OR, and recovery rooms.

An advanced wound care clinic, with HBO chambers, a surgical suite, imaging and lab capability, overnight rooms for patients and staff, sterilization, and modern recyclable and/or single-use surgical instruments. are included

PROFESSIONAL EXPERIENCE

DR. STEPHEN GORDON

Dr. Gordon has extensive experience performing reconstructive surgery in less-than-ideal surgical situations. As Chief Surgeon of the American Medical Team for Africa (AMTA) (1994) he led the 1st of many multispecialty surgical teams of doctors and surgical personnel from Grady Hospital, Atlanta to Muhimbili Medical Center in Dar es Salaam, Tanzania.

His extensive experience in the design-build process and management of burn and wound care modular surgery centers is an asset. Since 1981 Dr. Gordon led or participated in humanitarian surgical missions or evaluated the feasibility of establishing wound care surgical facilities in the USA and for the following countries; Barbados, Mexico, Panama, Aruba, Tanzania, Fiji, Ghana, Somalia & Somaliland

GHANA 2013

We provide a continuous, reliable supply chain solution for modular surgery centers through a comprehensive supply chain model that ensures medical instruments, supplies and products are on-site and in supply ready to support surgical activities.

Category 1

Surgical Packs of varying size and complexity.

Category 2

Sterile Separates, instruments, gloves, etc.

Category 3

Minor Procedure Trays such as Suture Removal, IV Start, Dressing Change

Category 4

Surgical Instruments

Category 5

NAICS 621600 HOME HEALTH CARE SERVICES

Our Mission is to provide exceptional quality of care for all home health needs through comprehensive communication and collaboration with our patients, family members, community agencies, and healthcare professionals.

Our Partners at [U R First Home Health](#), a Disabled Veteran Owned Company, are a trusted provider of home health services, accredited by the Joint Commission, delivering skilled, professional, and personalized nursing and therapy services in the comfort of our client's homes.

Skilled Nursing: We have dedicated registered nurses (RNs) and licensed practical nurses (LPNs) who are well-trained and experienced in administering medical treatments at home.

Physical Therapy: Our experienced physical therapists are essential to our patient's overall recovery at home. We want nothing more than to help our patients regain the physical functions they may have lost throughout the course of their illness. We help our patients resume normal activity through an extensive physical therapy program.

Occupational Therapy: We are committed to helping patients return to their daily routines. While sometimes difficult at first, our occupational therapists are determined to lend their skills and expertise every step of the way, getting patients involved in the activities of daily living and introducing them to more modified ways of going about such activities in the event of any permanent physical limitations.

Speech Therapy: Communication with friends and loved ones is vital. Being able to express oneself despite a challenging health condition is essential. We are committed to bridging the gaps for patients with language and speech disorders and swallowing disorders.

Medical Social Services: We are committed to helping our patients in any way we can, which includes providing other resources and connections that allow them to manage their health better. Our medical social workers do their best to provide support and assistance for the patient's social, environmental, and financial needs. They work to inform patients about these factors and how they could affect the health and well-being of their patients.

Personal Care: We are determined to provide personal care services that cater to all our client's care needs at home. Patients' needs and goals are met in the most effective and efficient ways through personalized solutions.

Wellness**

Last Shot

{ Nutrient Replenishment }

Health Conscious

Care providers want health-conscious patients and consumers in general to eat and drink foods that are safe and effective. The Last Shot formula replenishes electrolytes and essential vitamins your body needs while hydrating you at the same time.

Healthy Options

Whether it's the women and men in our military who follow a rigorous exercise regimen or wellness enthusiasts in general, we offer a healthy option to the so-called energy drinks on the market today.

Healthy Beverage

Last Shot® was developed as a healthy beverage that optimizes hydration in the body after an intense training, workout or similar activity such as while traveling long hours where the body's nutrients need replenishment.

Healthy Results

Last Shot® helps remove toxins in the liver. This allows for the body to detox more efficiently and may help reduce cell damage and dehydration associated with playing hard night or day.
